

Teceo Schröder

The Teceo range comes in two sizes. The Teceo 1 for up to 48 LEDs is ideally suited to lighting residential streets, urban roads, bike paths and car parks, while the Teceo 2 for up to 144 LEDs is perfect for large roads, avenues and motorways. It is equipped with the second generation LensoFlex2 photometric engine which offers high-performance photometry optimised for each specific application with minimum energy consumption.

UN

Ewo

UN merges together the shapes and proportions of its mast and lamp head, with the head evolving out of the cylindrical cross-section of the mast. The lamp appears discreet and reserved from the front - ensuring the visual appearance of nearby facades impaired. UN can be fitted with between 2 and 5 light units. This modularity enables a precise control of light intensity.

Lunio Arcluce

An LED-only luminaire for urban lighting, Lunio offers a modern, minimal design ideal for urban settings, pathways, outdoor public and private areas, parks and gardens. Arcluce's ZDlight Street system ensures constant lighting emission through the product's entire life cycle. Total control of the power output and a dynamic planning function enable automated light handling.

Mikado Technilum

Mikado is designed using Technilum's patented fully weld free aluminium construction process.

The luminaire was initially created in collaboration with the lighting designer Yon Anton Olano for the redesign of Pey Berland Square in Bordeaux, France. Mikado is available in three different sizes dubbed GM, PM and Nano.

Avenue F LED Thorn

Thorn Avenue F LED post-top lanterns use a 40W LED module to achieve a light level of 6 lux average and feature a cylindrical prismatic crown optic to minimise glare and give a symmetrical light distribution - ideal for open areas. They give a high light output efficiency (71 l-lm/W) as well as high quality, white light (4200K) to achieve a signature daytime look.

Arcoo Multiline

Arcoo offers an angular, minimal profile and a slim 40mm front view in both wall-mounted and bollard versions. Its waterproof LED head has a power of 4.3W and a light colour of 3000K and is supplied with a waterproof driver equipped with two connection wires and with waterproof clamps to ensure a safe connection to the mains supply. A smooth, uniform light is provided by a satin PMMA diffuser.
